Weatherization Work

Work on your home will take place on days and times that work best for you. Most jobs take two to five days to complete. GBCA employs our own crews, so your work will be performed by qualified professionals you can trust. If work is needed on heating equipment or hot water heaters, a licensed contractor will be hired to perform that work at no cost to you.

Safety

Our program does more than help to save on your energy bills. We also perform safety tests on appliances, smoke detectors, carbon monoxide detectors and heating systems.

Overview

GBCA's Weatherization Program has helped more than 3,300 Bergen County residents since 2009.

GBCA's Weatherization Service is part of a U.S. Department of Energy program that assists qualified low-income homeowners and tenants to improve the energy efficiency of their homes. If you qualify, there is no charge for these services.

GETTING STARTED IS EASIER THAN YOU THINK!

How Our Program Works

1. Call our office at 973-546-1441 or go to www.greaterbergen.org/home-energy for an application.
2. Mail or bring in your completed application. One of our home energy specialists will set up a free home energy audit with you.
3. After your home audit is completed, our specialist will discuss what services are needed, and will set up a second appointment to complete the work.
